

SEYONG

Student · Scientific Computing · Document Automation

yongyong0206@snu.ac.kr

github.com/SleepingDawn

Seoul, South Korea

PROFILE

Student at Seoul National University interested in scientific computing, browser automation, PDF processing, and reliable data pipelines. I build complete workflows with clear documentation, inspectable outputs, and reproducible operating steps.

EDUCATION

Seoul National University

Undergraduate student · Major not publicly listed

SELECTED PROJECTS

Paper Download Pipeline

Unified Linux pipeline for publisher landing-page validation, research PDF downloads, and reproducible browser-automation experiments.

PDF2HWPX

Document-processing workflow that analyzes exam PDFs and produces editable HWPX files with review-ready PDF output.

SleepingDawn.github.io

Responsive and accessible personal portfolio designed with Codex and deployed as a static GitHub Pages site.

SKILLS

Programming Python · HTML · CSS · JavaScript · Git	Focus areas Browser automation · PDF processing · Data pipelines
Systems Linux · Chromium · Command-line workflows	Working style Automate · Validate · Document

PLANNED LEARNING

Data Structures & Algorithms · Machine Learning · Database Systems · Human-Computer Interaction
